DIVISION OF APPLIED FIZZICS

FIZZIQ RE-PACKING INSTRUCTIONS

Please contact Evan Wallace on his cell at (425) 770-3826 if you need assistance in the re-packaging process.

____Lower the platform. You will ship unit with the platform in the down position.

____Secure platform by wedging white foam platform restrainer on top of the platform, curved side out.

____Disconnect all hoses and power supply. You do not need to ship these back to us for service.

____Set machine in lower white foam insert, and put upper white foam insert on top or machine. The lower foam is the one with the cutout for the bulkhead fittings.

____Place the machine with foam inserts in the smaller box and tape shut.

____Put a layer of bubble wrap on bottom of larger box, and set smaller box inside. Stuff bubble wrap around the perimeter of the box, and put remainder of packing materials across the top. (PUT THIS PACKING BACK IN THE BOX EXACTLY THE WAY IT WAS SHIPPED.)

____Tape the large box shut with two layers of tape on all edges.

____Affix UPS labels and ship.

This image shows the FIZZIQ machine correctly packed in the inner box.
